EXPERIMENT – 2

Encryption – Crypto 101 using TryHackMe

Aim:

To understand the fundamentals of cryptography by performing hands-on exercises in the Crypto 101 room on the TryHackMe platform, including basic encryption, encoding, hashing, and cryptographic concepts.

Procedure:

Step 1: Login to Platform
Open browser and go to TryHackMe.
Login using your account.

Step 2: Open Crypto 101 Room

Search for **Crypto 101** and click **Join Room**.

Step 3: Start Environment

Click **Start Machine / AttackBox to launch the virtual lab.**

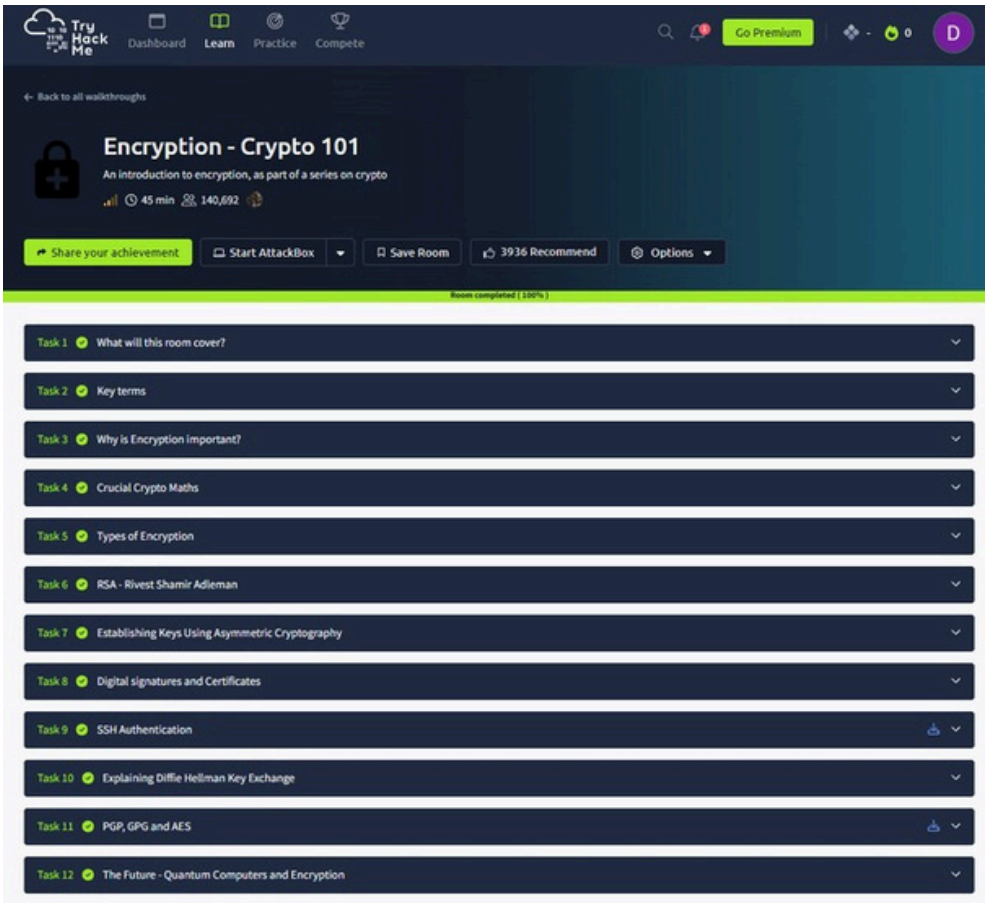
Step 4: Perform Cryptography Tasks

(a) Base64 Encoding/Decoding

(b) Hex Conversion

(c) Caesar Cipher

Step 5: Submit Answers
Enter the decoded results in the answer boxes and complete all tasks.



Result

Basic cryptography concepts such as encoding, decoding, hashing, and classical ciphers were successfully performed using TryHackMe.
